4. Thoroughly dry cooker body, lid, and all accessories. Reassemble for next use.
.....

TROUBLESHOOTING

• **Rice is too dry/hard after cooking.**

If your rice is dry or hard/chewy when the cooker switches to **Keep Warm**, additional water and cooking time will soften the rice. Depending on how dry your rice is, add ½ to 1 cup of water and stir through. Close the lid and switch to **Rice**. When cooker switches to **Keep Warm** mode, open the lid and stir the rice to check the consistency. Repeat as necessary until rice is soft and moist.

• **Rice is too moist/soggy after cooking.**

If your rice is still too moist or soggy when the cooker switches to **Keep Warm**, use the serving spatula to stir the rice. This will redistribute the bottom (moistest) part of the rice as well as release excess moisture. Close the lid and allow to remain on **Keep Warm** mode for 10-30 minutes as needed, opening the lid and stirring periodically to release excess moisture.
.....

Note:

- Do not use harsh abrasive cleaners, scouring pads or products that are not considered safe to use on nonstick coatings.
- If washing in the dishwasher, a slight discoloration to the inner pot and accessories may occur. This is only cosmetic and will not affect performance.
- Any other servicing should be performed by Aroma® Housewares.

Helpful Hints:

The provided rice cooker cup is the equivalent to a ¾ standard US cup.

Note:

- Because different types of rice may vary in their make-up, results may differ.

For approximate rice cooking times and suggested rice/water ratios, see the "Rice & Water Measurement Table" on page 8.

- Opening the lid during the cooking cycle causes a loss of heat and steam. Cooking time may be prolonged if the lid is opened before the rice is finished.
- Rinse rice before placing it into the inner pot to remove excess bran and starch. This will help reduce browning and sticking to the bottom of the pot.
- Want perfect brown rice without the wait? Use the **Delay Timer**. Simply add rice and water in the morning and set **Delay Timer** for when rice will be needed that night.
- This chart is only a general measuring guide. As there are many different kinds of rice available, rice & water measurements may vary.

Helpful Hints:

Smaller foods may be placed on a heat-resistant dish and then placed onto the steam tray. Parchment paper or aluminum foil may be used as well. For best results, it is recommended to puncture small holes in the paper/foil.

For suggested steaming times and water amounts, see the meat and vegetable steaming tables on page 11.

The countdown feature is an excellent way to plan when adding the steam tray to ensure the rice and steamed food finish cooking at the same time.

Refer to the steaming tables for meats and vegetables on page 11 for hints and approximate steaming times. See the "Rice & Water Measurement Table" included on page 8 for approximate rice cooking times.

- Do not attempt to cook more than 2 cups (uncooked) of rice if steaming and cooking simultaneously.
